DETAILED ACTION

Election/Restrictions

1. Claims 1-9 and 17-18 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 7/28/05.
2. Claims 1-9 and 17-18 have been withdrawn, claims 20-22 have been added by the Applicant's as in the Amendment filed on 7/28/05.

Drawings

3. Figures 12, 13A, 13B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

Art Unit: 2824

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

EXAMINER'S AMENDMENT

The application has been amended as follows:

Change the title to:

MAGNETIC ELEMENTS HAVING UNIQUE SHAPES

In the Abstract, replace "**There are disclosed magnetic**" by – **Magnetic** –

In the drawings, label Figure 12, 13A and 13B as – **Prior Art** --

Allowable Subject Matter

5. Claims **10-16**, and **19-22** are allowed.
6. The following is an examiner's statement of reasons for allowance:

The prior art of record fail to disclose a substantially circular-shaped or oval-shaped magnetic element, in combination with other cited limitations, defining an outer periphery and a gap void having an open end facing the outer periphery so as to form a gap along the outer periphery, wherein the magnetic element does not include an annular void that is spatially isolated from the gap void as recited in claims **10** and **19**.

Claims **11-15**, **20-22** are therefore allowed because of their dependency on claim **10**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- a. Ross et al (US 6,906,369) disclose a magnetic memory elements using 360o walls.
- b. Bloomquist et al (US 6,906,947) disclose an in-plane toroidal memory cell with vertically stepped conductors.
- c. Yamamoto et al (US 6,940,750) disclose a magnetic memory having a disc-shaped and a ring-shaped.
